

# Tasmanian Clinical Supervision Support Project

## Fact Sheet

July 2014

### Overview

The quality of clinical supervision is one key influence on the quality of the clinical placement, and ultimately, on the calibre of the health practitioner.

The National Clinical Supervision Support Program (CSSP) aims to expand clinical supervision capacity and competence across the educational and training continuum by supporting measures to:

- Prepare and train clinical supervisors.
- Deliver and develop a competent clinical supervision workforce, which delivers quality training.

As part of this program, Health Workforce Australia developed and published the overarching [National Clinical Supervision Support Framework](#) and the [National Clinical Supervision Competency Resources – Validation Edition](#). These documents provide the foundation for the National Clinical Supervision Skills Initiative Program.

### The Tasmanian Clinical Supervision Support Program

The Tasmanian CSSP will deliver a range of interprofessional education and training opportunities for new and existing clinical supervisors across Tasmania as facilitated through the The Tasmanian Clinical Education Network (TCEN).

The TCEN expands the whole of Tasmania, across all health disciplines, all health education and clinical placement organisations to facilitate and promote Supervision Support activities and resources –

### Further Information

Please contact:

Project Lead Carolyn Salter

E: [Carolyn.salter@dhhs.tas.gov.au](mailto:Carolyn.salter@dhhs.tas.gov.au)

P: (03) 6233 3881

or

Project Manager Sue Mythen

E: [sue.mythen@dhhs.tas.gov.au](mailto:sue.mythen@dhhs.tas.gov.au)

P: (03) 6233 2756

Education and training opportunities in clinical supervision are being offered in a variety of formats, including (but not limited to):

- Face-to-face workshops
- Extended courses.
- On-line courses and resources.
- E-learning modules.
- Train the trainer.

A CSSP Program Manager has been employed to help facilitate the education and training programs across the state and will assist in the alignment of Clinical Supervision activities to organisation and discipline requirements. All educational and training opportunities will be promoted and posted on the TCEN website.

### Project Outputs

Tangible outputs of the Project include:

- To actively promote and facilitate quality interprofessional Clinical Supervision activities across Tasmania
- To develop an electronic platform that will host a range of clinical supervision resources
- Provide the conduit to programs and resources that support clinical supervision activities
